Thermador Unveils All-New Masterpiece® Slide-In Induction Range, Expands Luxury Portfolio with New Entry Pricing Tier

- All-new [30-inch induction slide-in range](#) brings luxurious cooking to an attractive entry point – with an extra-large flexible cooking zone, HeatShift® and CookSmart® precision cooking features, PowerBoost® rapid boiling to real-time food temperature tracking and more
- A warming drawer, true convection cooking and a new pull-to-open rail system with pocket handle design deliver world-class touches
- Launching July 13, 2026 – with presales now available. Recommended retail price at \$6,199

IRVINE, Calif. (July 9, 2026) – [Thermador](#), the iconic home appliances pioneer that shaped the modern luxury kitchen, has launched the all-new [30-inch Masterpiece® induction slide-in range](#) – expanding its luxury portfolio with world-class cooking features at an attractive entry point.

“Throughout its rich history, Thermador has pioneered so much of the modern luxury kitchen, and we continue to pave the way, which includes bringing serious cooking technology to new groups of consumers,” said Chris Kaeser, Senior Vice President of Sales at BSH. “The new induction range anchors a four-piece luxury package, further enhancing the experience of consumers entering through that suite of Thermador products.”

Attainable Luxury Like #NoOneElse:

- The Masterpiece’s extra-large flexible cooking zone adapts to a range of cookware – even teppanyaki pans – and provides room for larger pieces, while the advanced induction system delivers rapid, even heating.

- Precision cooking within the Flexible Cooking Zone is delivered via HeatShift®, providing three pre-set temperature levels and CookSmart® technology. HeatShift® enables you to easily transition from sauté to simmer by simply shifting your pot forward or backward. CookSmart® ensures optimal results for a variety of foods, making cooking more simple and more efficient.
- Boiling water or other liquids is faster by up to 50% with PowerBoost® – saving time and effort. PanBoost® heats food at a temperature higher than the cooktop’s highest power level, and is excellent for searing steaks, fish or vegetables.
- The warming drawer holds 27 dinner plates with three different heat levels – making it perfect for entertaining.

“The new Masterpiece® slide-in range – designed for a built-in look – continues to build on the rich pioneering heritage of the Thermador brand, bringing industrial-inspired cooking to the everyday kitchen,” said Beatriz Sandoval-Maldonado, Head of Thermador Brand Marketing at BSH. “It’s only fitting that on the brand’s 110-year birthday that we launch a new range that delivers advanced induction technology, true convection cooking and more luxury features for consumers that are stepping into the world of Thermador for the first time.”

For more information on the new induction range, or on more of the brand’s iconic product lineup, please visit: www.thermador.com. Consumers and designers may also find inspiration through [the all-new kitchen package planner](#).

About Thermador

Since 1916, Thermador has pioneered breakthroughs that have shaped the modern kitchen – from the world’s first wall ovens and stainless-steel appliances, gas cooktops with the patented Star® Burner, the first full-surface induction appliance to the first modular built-in fresh food, freezer and wine preservation columns. Founded in Southern California, the brand’s rich history has shaped it into today’s luxury home appliance icon.

The Masterpiece® collection inspires with contemporary design elements and industry leading technology, while the Professional collection delivers the ultimate in boldly designed, luxury smart appliances for restaurant-caliber performance at home. Thermador is part of Munich based BSH Home Appliances Group (a Bosch Group company), the largest manufacturer of home appliances in Europe and one of the leading companies in the sector worldwide.
